BATHROOM REMODELING STARTING PLAN

01

STEP ONE ASSESS YOUR PURPOSE

Is it a full bathroom or a half-bath? Do you want to get rid of the old one completely and start over, or do you want to keep some of the details to incorporate into your new bathroom?

02

STEP TWO CONSIDER THE SPACE

It is crucial to consider the relationship between design and space when executing a project. Make the most of the space you have and set realistic expectations for your new bathroom.

03

STEP THREE SET AN ESTIMATED BUDGET

You can expect a few unforeseen details during a remodel, such as corroded, leaky or old galvanized pipes in older homes. For extra surprises, add a little extra budget.

04

STEP FOUR CHOOSE GREAT MATERIALS

If you pin a photo on Pinterest, it may look perfect for your space, but keep in mind that materials and textures differ. Remember: the products you are shopping for have to meet the needs of your remodel.

BATHROOM REMODELING STARTING PLAN

05

Establish a focal point. When you stand in your bathroom doorway, what is the first thing you see? Redesign the layout if you see the toilet. You want to see a vanity, a bathtub or a beautiful shower, right?

06

Select your flooring. Besides the trends, you want to pick a tile that makes sense to your routine. Timeless and durable materials such as porcelain, ceramic, and stone are beautiful choices and resistant to water. Don't forget the baseboard tiles: they are a plus.

07

The lighting design. While a beautiful faucet adds a luxurious touch to the room, lighting gives life to it. You can add lights to the vanity or simply install a dimmer on one of your light fixtures. You can switch from bright to get dressed to cozy to relax.

A FEW THINGS YOU SHOULD CONSIDER

Ventilation is a must-have. Weather you choose a window or a vent fan, a good system have to be in place to draw out moisture, odors & humidity. Let's prevent the buildup of mold and mildew.

Maximize the space. Use the space with a purpose. Glass doors for tubs and showers open up the room, floating cabinets free up space under the sink, shower niche for products, built-in shelves everywhere.

Countertops are timeless. The material and color for your vanity depend on your routine and style. If you want to add a unique look to it, go towards natural stones such as marble, quartzite or granite.

Extra outlets. Just for the simply saying that two people can be getting ready in the same place, you will want more outlets for different devices. Check the electrical layout beforehand.

Tiles in the shower. Consider to add larger tiles in the shower as they will make it look and feel bigger. Also, seamless grout lines and less cleaning worries.
