# WALL CONFIGURATIONS

Hang 66 inches from floor to middle of art

Space between is no more than 1/2 width of art

For example, if frames are 10 inches wide, the space between the two frames should be no more than 5 inches wide.

With adjacent walls, hang the **smaller** art piece so that it is centered on the bigger art piece

## The "Rainbow effect"

Hang the art so that it arches in the middle like it does here to look like a rainbow.

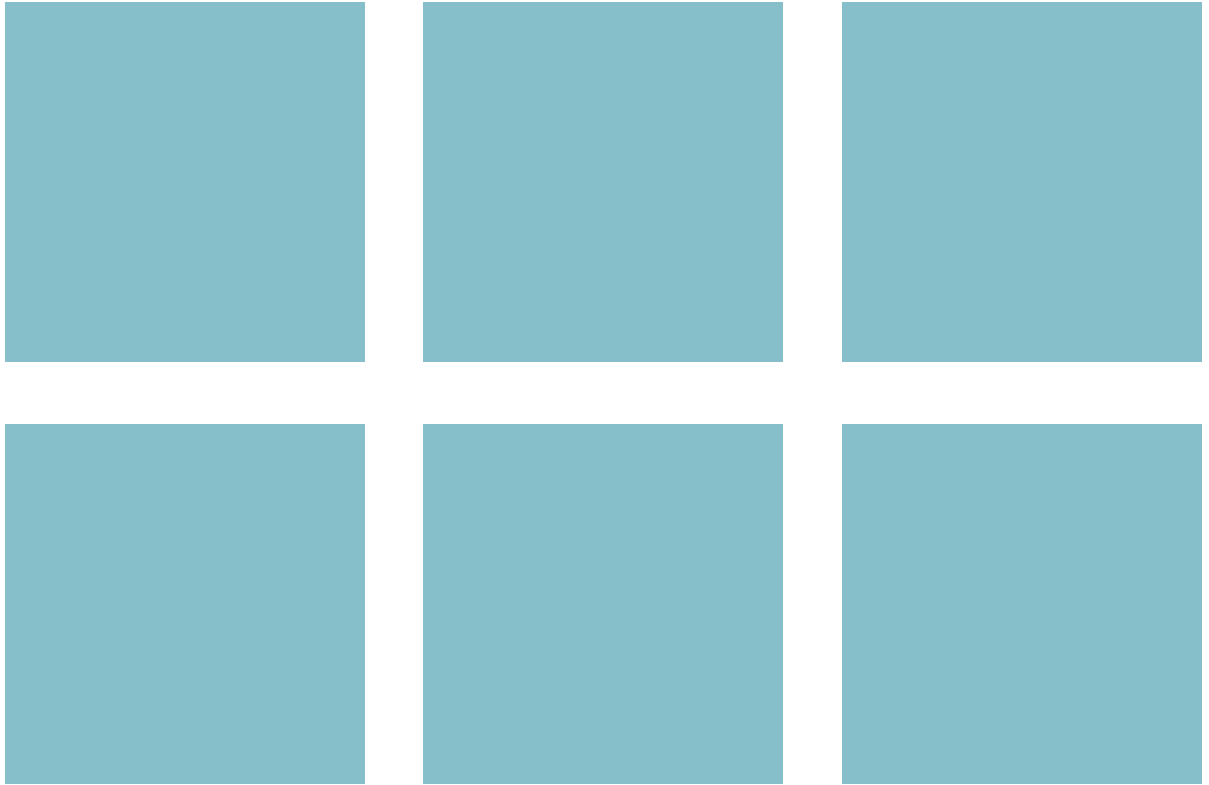

It is ok to have the middle art piece higher than the 2 on either side.

Make sure the art piece does not extend past the furniture piece.

Notice how all 3 wall art pieces are aligned at the top (laser level helps here).

# GALLERY WALL

In a hallway

Use kraft paper to trace around your artwork and hang up on wall to visualize it before hanging up anything

Over a  
foyer table

Over a couch or buffet table
